### Report Overview

PFAS-free textile refers to a type of fabric or textile material that does not contain per- and polyfluoroalkyl substances (PFAS). PFAS are a group of man-made chemicals known for their non-stick and water-repellent properties, which have been widely used in various industries, including textiles, for their ability to repel oil, water, and stains. However, due to concerns over their potential health and environmental impacts, there is a growing demand for PFAS-free textiles. These textiles are designed and manufactured without the use of PFAS chemicals, ensuring a safer and more eco-friendly alternative for consumers who are conscious of the potential risks associated with PFAS exposure. PFAS-free textiles are often used in clothing, upholstery, and other applications where non-stick or water-repellent properties are desired, without compromising on safety and sustainability.
