Report Overview

Pharmaceutical strip foil is a specialized packaging material used primarily for blister packs, which securely store individual doses of solid oral medications such as tablets, capsules, and lozenges. Composed of multiple layers, it typically includes an aluminum or plastic base for rigidity and barrier properties, along with heat-sealable coatings to ensure product integrity by protecting against moisture, oxygen, light, and contamination. The foil's design facilitates easy push-through dispensing while maintaining tamper-evidence and compliance with stringent pharmaceutical safety regulations. Its widespread adoption is driven by the need for extended shelf life, patient convenience, and adherence to global packaging standards like those set by the FDA and EMA.
