Abstracts

The plastic coated composite steel pipe is made of steel pipe as the matrix, and the inner wall (the outer wall can be coated with plastic when needed) by powder fusion spraying technology, with excellent performance. Compared with ordinary pipe, it has the advantages of anti-corrosion, no rust, no fouling, smooth and smooth, clean and non-toxic, and long service life. According to tests, the service life of the plastic coated composite pipe is more than three times that of the ordinary pipe. Compared with plastic pipes, it has the advantages of high mechanical strength, pressure resistance and heat resistance. Since the substrate is a steel pipe, there is no embrittlement or aging problem. It can be widely used in oil, gas, chemical products and other fluid transportation and heating projects.
