### Report Overview

Plastic threaded knobs are a type of fastening component commonly used in various industries to secure or adjust parts and mechanisms. These knobs are made from durable plastic materials, which provide a lightweight and cost-effective solution compared to metal alternatives. They feature a threaded shaft that allows them to be screwed onto a threaded rod or bolt, providing a means to tighten or loosen the connection as needed. The knobs themselves often have a smooth, cylindrical shape with a flange or a grip pattern, facilitating easy turning by hand. They are widely used in applications such as furniture, machinery, and equipment where a secure and adjustable connection is required, and where the use of metal might be impractical or too heavy. Plastic threaded knobs are appreciated for their resistance to corrosion, ease of installation, and the ability to be molded into various shapes and sizes to fit specific design requirements.
