Report Overview

A Pleated Membrane Capsule is a specialized type of filtration device that utilizes a pleated design to maximize surface area and enhance filtration efficiency. This capsule is typically composed of a semi-permeable membrane material, such as polyvinylidene fluoride (PVDF) or polypropylene, which is pleated and enclosed within a protective casing. The pleated structure allows for a greater contact area between the fluid and the membrane, resulting in improved flow rates and reduced pressure drop. Pleated Membrane Capsules are widely used in various industries, including water treatment, food and beverage processing, and pharmaceutical manufacturing, to remove contaminants, bacteria, and other impurities from liquids. They are known for their high filtration precision, chemical resistance, and durability, making them a reliable choice for maintaining fluid purity and quality.
