Abstracts

A pneumatic tube system is an elaborate system of airlift, air tubes, and air transport. Another way to visualize the system would be as a pipeline of capsules. These capsules can add efficiency and security to your hospital and are now considered to be one of the leading methods of transport among medical professionals. Between a sending station and receiving station information, lab test results, medical specimens and other essential hospital materials are able to be transferred as quickly as possible and much faster than any human would be able to achieve the same results. Tubes can be outfitted to host and transport any necessary object or material.
