Abstracts

Polycarbonate (PC) siloxane copolymer for electric vehicles is a specialized copolymer designed for use in electric vehicles. It combines polycarbonate's excellent transparency and toughness with siloxane's flexibility and resistance to UV degradation and weathering. In the field of electric vehicles, it is mainly used in electric vehicle charging guns. EV Market Growth: The rapid rise in electric vehicle sales, driven by government incentives, environmental concerns, and advancements in battery technology, is significantly boosting the demand for high-performance materials like PC siloxane copolymers. Focus on Durability and Sustainability: EV manufacturers are emphasizing the need for materials that offer both durability and recyclability. PC siloxane copolymers meet these needs by providing impact resistance, optical clarity, and long-term stability. Price Sensitivity: Although the material's performance is superior, the higher cost of PC siloxane copolymers compared to more conventional plastics could limit their adoption in more price-sensitive EV segments.

The global Polycarbonate (PC) Siloxane Copolymer for EV market size was estimated at USD 55.9 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.
