### Report Overview

Polyester masking discs are precision-engineered adhesive-backed circular films used primarily in surface protection, painting, and coating applications across industries such as automotive, aerospace, electronics, and general manufacturing. These discs are made from durable polyester material, offering high heat resistance, chemical stability, and dimensional consistency, making them ideal for masking off specific areas during processes like powder coating, anodizing, or plating. Their adhesive properties ensure secure placement without residue, while their uniform thickness prevents bleed-through. The market for polyester masking discs is driven by demand for efficient, high-precision masking solutions that minimize waste and labor costs compared to traditional tapes or liquid masking.
