### Report Overview

Polyoxytetramethylene (PTMG), also known as polytetramethylene ether glycol, is a high-performance polyether glycol primarily used as a key raw material in the production of elastic fibers (such as spandex), thermoplastic polyurethanes (TPU), and other polyurethane applications. It is characterized by its excellent flexibility, hydrolysis resistance, and mechanical properties, making it indispensable in industries like textiles, automotive, and footwear. The global PTMG market is driven by increasing demand for stretchable and durable materials in sportswear, medical textiles, and industrial applications, with Asia-Pacific dominating production and consumption due to the presence of major spandex manufacturers in China, South Korea, and Japan. However, fluctuating raw material prices (particularly butadiene-derived feedstocks) and environmental concerns related to petrochemical-based production pose challenges, prompting research into bio-based alternatives. Key players include BASF, Mitsubishi Chemical, DCC, and Invista, with innovation focusing on sustainable production methods and high-purity grades for specialized applications.

The global Polyoxytetramethylene (PTMG) market size was estimated at USD 2645.09 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.
