Abstracts

Pre-Coated Fastener means that the fastener has been pre-coated with a layer of anti-corrosion, anti-rust or friction-increasing coating before leaving the factory. This coating can enhance the performance of the fastener, improve its durability and reliability, making it more convenient and reliable during assembly and use. Pre-coated fasteners are usually coated using automatic coating lines, and the coating materials can be selected according to different needs, such as paint, thermoplastics, thermosetting plastics, etc. These coating materials can provide good anti-corrosion and anti-rust effects, increase friction, improve assembly efficiency, and reduce slippage during assembly. Pre-coated fasteners are widely used in various industries such as construction, automotive, electronics, home appliances, etc. Due to their excellent performance and ease of use, pre-coated fasteners have become an important part of modern industrial assembly. The overall market trend for pre-coated fasteners shows continued growth. With the rapid development of the manufacturing industry and the recovery of the global economy, the demand for fasteners continues to grow, especially for pre-coated fasteners with high performance requirements such as anti-corrosion and anti-rust. At the same time, the continuous innovation and application of new material technology has provided a broader development space for pre-coated fasteners, making them widely used in many fields such as aviation, automobiles, electronics, and home appliances. In addition, the strengthening of environmental protection regulations has also prompted companies to pay more attention to the procurement of environmentally friendly products, further promoting the growth of the pre-coated fastener market. However, changes in market demand and the speed of technological innovation have also made market competition increasingly fierce. Enterprises need to increase investment in technology research and development and innovation, improve product quality and reduce costs to adapt to the changing market environment and maintain competitive advantages.

The global Pre-Coated Fastener market size was estimated at USD 719.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
