Report Overview

The Pre-Collision System (PCS) is a cutting-edge automotive safety technology designed to enhance driver safety and reduce the likelihood of collisions. This advanced system utilizes a combination of sensors, cameras, and radar technology to monitor the vehicle's surroundings and detect potential hazards. When the PCS identifies a risk, such as a sudden stop or an object in the vehicle's path, it alerts the driver through visual and audible warnings. If the driver fails to respond in time, the system may automatically apply the brakes or initiate other safety measures to mitigate the impact of a collision.
