Report Overview

Pressure-Sensitive Formaldehyde-Free Adhesive is a type of adhesive that is designed to bond materials together without the use of formaldehyde, a harmful chemical compound. This adhesive is pressure-sensitive, meaning it adheres to surfaces when pressure is applied, and it forms a strong bond without the need for heat or solvents. The product is particularly useful in industries where formaldehyde-free products are required due to health and safety concerns, such as in the production of furniture, flooring, and other consumer goods. The absence of formaldehyde makes this adhesive a safer alternative for both manufacturers and end-users, reducing the risk of exposure to harmful vapors and contributing to a healthier indoor environment.
