Processed eggs refer to egg products that have been modified from their natural state through various methods such as pasteurization, drying, freezing, or blending for extended shelf life, convenience, or specialized applications. These include liquid eggs (whole, whites, or yolks), dried or powdered eggs, frozen eggs, and pre-cooked egg products like omelets or scrambled eggs. Processing enhances food safety by eliminating pathogens, improves stability for storage and transport, and allows for customization to meet specific culinary or industrial needs, such as in bakeries, food service, or packaged foods.
