Report Overview

A Psychological Counseling Chatbot is an artificial intelligence-powered virtual assistant designed to provide psychological support, guidance, and counseling through text-based or voice-based conversations. It utilizes natural language processing and machine learning algorithms to understand and respond to users' emotional needs, concerns, and questions. The chatbot aims to offer immediate, accessible, and confidential mental health assistance, covering a wide range of topics such as stress, anxiety, depression, and relationship issues. It can help users identify their feelings, provide coping strategies, and even refer them to professional help when necessary. While the chatbot is not a replacement for human therapists, it serves as a valuable tool for individuals seeking initial support or those who may not have access to traditional mental health services.
