Abstracts

The Pulse Laser Dry Eye Therapy Apparatus is a medical device designed to provide non-invasive treatment for dry eye syndrome. It uses low-level laser therapy (LLLT) to stimulate the production of tears and reduce inflammation in the eyes. The apparatus emits pulses of light that are absorbed by the cells in the eyelids, which triggers a healing response and improves tear production. This therapy can be effective for patients who suffer from chronic dry eye or other eye conditions that affect tear production. However, it's important to note that this therapy should only be used under the guidance of a trained healthcare professional.
