Report Overview

Real Estate Investment Trusts (REITs) are publicly traded companies that own, operate, or finance income-producing real estate across various sectors, including residential, commercial, retail, healthcare, and industrial properties. Structured to provide investors with dividend income and capital appreciation, REITs must distribute at least 90% of taxable income to shareholders, making them attractive for income-focused portfolios. They offer liquidity compared to direct real estate ownership while providing exposure to diversified property portfolios. The market for REITs has grown significantly due to their ability to democratize real estate investments, allowing retail investors to participate in large-scale properties without substantial capital outlay. Performance is closely tied to real estate market conditions, interest rates, and economic cycles, with demand driven by factors like urbanization, demographic shifts, and corporate expansion. Regulatory frameworks, such as tax advantages and mandatory payout ratios, further shape the REIT landscape, fostering both domestic and international investment opportunities.

This report provides a deep insight into the global Real Estate Investment Trusts (REITs) market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, value chain analysis, etc.
