### Report Overview

Rear Loader Trucks, also known as rear-loading garbage trucks or compactor trucks, are specialized commercial vehicles designed for the efficient collection and transportation of waste materials. These trucks are characterized by their rear-loading mechanism, which allows waste to be compacted and loaded from the rear end. The primary function of Rear Loader Trucks is to collect waste from commercial and residential areas and transport it to disposal or recycling facilities. They are equipped with a hydraulic system that enables the mechanical arm to lift and empty waste containers into the truck's compactor body. The compactor compresses the waste, allowing for a higher payload capacity and reducing the number of trips needed to dispose of the waste. Rear Loader Trucks are an essential component of waste management systems, contributing to the efficiency and sustainability of waste collection processes.
