### Report Overview

A Rebuildable Tank Atomizer (RTA) is a type of vaping device used for electronic cigarettes. It's a tank system with a rebuildable atomizer deck. Unlike regular tanks where you buy pre-built coils, an RTA allows users to build and install their own coils and wicks. This customization gives vapers more control over their vaping experience, allowing them to tailor the resistance, coil material, and wicking material to their preferences. RTAs typically have a tank section to hold e-liquid, making them convenient for extended vaping sessions without needing to constantly drip e-liquid onto the coils.
