### Report Overview

An indoor sauna room is an enclosed space designed for the purpose of sauna bathing within the confines of a building. It typically features wooden interior elements, such as benches and walls, and is equipped with a heating source, often a sauna stove or heater, to generate heat and create a high-temperature environment. Users enter the sauna room to experience the therapeutic effects of dry heat, which induces sweating and promotes relaxation. Indoor sauna rooms are popular for their health benefits, including improved circulation, detoxification, and stress relief, and they come in various sizes and designs to accommodate different preferences and available spaces within a home or facility.
