### Report Overview

The Rubik's Cube Mirror is a unique and innovative twist on the classic Rubik's Cube puzzle. It is a 3D combination puzzle that challenges users to align mirrored tiles on each of the six faces, rather than the traditional colored stickers. The cube is composed of smaller cubes, each with a mirrored surface, which can be rotated to achieve the desired pattern. The objective is to manipulate the individual cubes so that one continuous mirrored image is visible on each face of the larger cube. This version of the Rubik's Cube not only tests problem-solving skills and spatial awareness but also adds an aesthetic element, as the mirrored surfaces create a visually striking and reflective play experience.
