### Report Overview

Semi-permanent hair dye is a type of hair coloring product that offers a temporary, non-damaging solution for changing hair color. Unlike permanent dyes, which penetrate the hair shaft and last until the hair grows out or is cut, semi-permanent dyes only coat the hair surface, providing color that gradually fades with each wash. These dyes are ammonia-free and do not contain harsh chemicals, making them a popular choice for those who want to experiment with color without causing significant damage to their hair. They are also known for their wide range of vibrant, fashion-forward shades, allowing users to achieve a more dynamic and personalized look. The longevity of semi-permanent hair dye typically lasts for 4-12 washes, depending on the product's formula and the user's hair type, making it an ideal option for those who prefer a more temporary change or want to try out different colors without a long-term commitment.
