Report Overview

SGP (SentryGlas Plus) interlayer films are advanced structural materials primarily used in laminated glass applications, offering superior strength, safety, and durability compared to traditional PVB (polyvinyl butyral) films. These ionoplast-based films are engineered to enhance glass performance by providing higher stiffness, improved resistance to impact, and better post-breakage retention, making them ideal for demanding architectural, automotive, and security applications. The demand for SGP films is driven by increasing safety regulations, the growing preference for blast-resistant and hurricane-proof glazing in construction, and the need for lightweight yet durable materials in modern automotive design.
