Report Overview

Silicone Release Liner is a specialized type of material used in various industries, primarily for its non-stick properties. It is a thin, flexible sheet made from silicone, a type of polymer known for its heat resistance, chemical stability, and flexibility. The product is designed to be used as a protective layer or barrier between surfaces that need to be separated without adhesion, such as in food processing, adhesive applications, or manufacturing processes. Silicone Release Liner works by providing a smooth, easily separable surface that prevents sticking, making it easier to remove items like baked goods, adhesive tapes, or other products from their substrates. It is valued for its durability, reusability, and the ability to withstand high temperatures without degrading, which makes it a preferred choice in applications where consistent release and minimal product waste are critical.
