Abstracts

Diamond wire has the advantages of being sharp, high cutting speed, and environmentally friendly. Compared with traditional cutting equipment, diamond wire cutting machines have better cutting surfaces and smaller cutting cuts, which can save materials. Single-wire diamond wire cutting machines have only one cutting wire, which achieves the purpose of cutting by high-speed grinding between the diamond wire and the object. They are suitable for work with high requirements for cutting delicate parts or specific shapes. Single-wire diamond wire cutting machines have the advantages of less material loss, fast cutting speed, high precision, and more stability.

The global Single Diamond Wire Cutting Machine market size was estimated at USD 285.42 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.75% during the forecast period.
