Residual Current Devices help protect people and equipment against electrical shocks caused by indirect contact. RCDs work together with Miniature Circuit Breakers (MCB) or fuses, covering the whole system against potentially damaging thermal and dynamic stresses of any overcurrent. This unit replaces a standard socket outlet. It provides protection to anyone that comes into contact with the equipment plugged into the socket outlet and its leads. These are great for both fire and electrocution protection when using appliances.

The global Socket Outlet Residual Current Devices market size was estimated at USD 3650.42 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.15% during the forecast period.
