### Report Overview

A soft surfboard, also known as a "foamie", is a surfboard made from slightly softer material than what is used for standard surfboards<sup>1</sup>. Softboards are wider, thicker, and have more volume than a hard top surfboard, making it easier for anyone to catch even the smallest fat wave. Soft top surfboards are made with an EPS foam core wrapped in either fiberglass or a synthetic wrap, and replace the hardened fiberglass or epoxy top layer with a soft, dentable Ethylene-Vinyl Acetate (EVA) sheet. The soft deck of a softboard does not require any waxing, and is less harmful than a standard polyurethane (PU) surfboard in case of a wipeout<sup>4</sup>.
