Report Overview

Spherical Cored Wire is a type of welding consumable specifically designed for flux-cored arc welding (FCAW) processes. It is characterized by its unique core shape, which is spherical in nature, as opposed to the traditional tubular or cylindrical core. This distinctive design allows for enhanced performance in terms of arc stability, metal transfer, and weld bead formation. The spherical core typically contains flux and other alloying elements that contribute to the weld's properties, such as strength, toughness, and corrosion resistance. The wire is used in various industries, including construction, automotive, and heavy machinery, for joining metals like steel and stainless steel. It is particularly beneficial in applications where high deposition rates, improved weld quality, and reduced spatter are desired.
