Report Overview

Spiral Wrap Tubing is a type of flexible tubing designed for various industrial and commercial applications. It is characterized by its unique construction, which involves a spiral-wound reinforcement layer around the inner and outer surfaces of the tubing. This spiral reinforcement provides the tubing with enhanced flexibility, kink resistance, and pressure tolerance compared to standard smooth-walled tubing. The material used for Spiral Wrap Tubing can vary, but it is often made from materials such as polyethylene, PVC, or other polymers, depending on the specific requirements of the application. Common uses for Spiral Wrap Tubing include fluid transfer, air lines, and as a protective covering for other types of tubing or cables.
