Report Overview

Sugarcane plates are a type of eco-friendly and sustainable tableware made from the byproducts of sugarcane processing, specifically bagasse. These plates are derived from the fibrous residue left over after the juice has been extracted from sugarcane stalks. They are known for their biodegradability, as they break down naturally in a compost environment within a few months, reducing their environmental impact compared to traditional plastic or Styrofoam plates. Sugarcane plates are often used for disposable table settings, catering events, and everyday use, offering a green alternative to non-renewable materials.
