Abstracts

Sustainable sportswear refers to sportswear that minimizes negative impacts on the environment throughout its life cycle of design, production, use and disposal. This type of clothing usually uses environmentally friendly materials and aims to meet consumers' demand for high-performance sports equipment while also paying attention to environmental protection and social responsibility. The growth of the sustainable sportswear market is mainly driven by consumers' increasing environmental awareness, rising pursuit of a healthy lifestyle, and brands' active response to the green economic transformation. As the global climate change problem becomes increasingly serious, more and more consumers tend to choose products that have less impact on the environment, which has prompted sports brands to increase their investment in sustainable material research and development and eco-friendly manufacturing processes. The support of government policies and the green consumption concept advocated by international organizations have also provided a good external environment for the development of the industry.

The global Sustainable Sportswear market size was estimated at USD 8764.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Sustainable Sportswear market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the

industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Sustainable Sportswear market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Sustainable Sportswear market.

Global Sustainable Sportswear Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
