Abstracts

LncRNA is non-coding RNA with a length of more than 200 nucleotides. Compared with mRNA, lncRNA is generally low in expression and has stronger tissue specificity. As a hot spot of RNA research, lncRNA regulates the expression of coding genes at various levels, including epigenetic inheritance, transcription and post-transcription. Different from traditional chip inspection, lncRNA analysis combined with high-throughput sequencing technology and bioinformatics analysis can comprehensively excavate the information of lncRNA in samples. LncRNA sequencing technology has been widely used in genetic improvement of species, and disease studies on occurrence, development, diagnosis, and treatment.
