Report Overview

Tea Polyphenol Palmitate, also known as TPP, is a derivative of tea polyphenols, which are naturally occurring compounds found in tea leaves, particularly green tea. These polyphenols are known for their antioxidant properties and potential health benefits. In the form of palmitate, the polyphenols are esterified with palmitic acid, a saturated fatty acid. This chemical modification enhances the solubility and bioavailability of the polyphenols, making them more easily absorbed by the body. Tea Polyphenol Palmitate is often used in dietary supplements and functional foods due to its improved stability and absorption compared to native tea polyphenols. It is also valued for its potential to support cardiovascular health, as it may help to reduce cholesterol levels and protect against oxidative stress.
