### Report Overview

Textile Oligomer Removing Agents are specialized chemical compounds designed to effectively remove oligomers from textiles. Oligomers are short polymer chains that can be present in synthetic fibers and may cause issues such as color bleeding, dye transfer, and fabric degradation. These agents work by breaking down or solubilizing the oligomers, thus preventing them from affecting the quality and performance of the textile. They are typically used in the dyeing, printing, and finishing processes of textiles to ensure colorfastness, enhance fabric softness, and improve overall fabric quality.
