Report Overview

Therapeutic diets for pets are specially formulated nutritional plans designed to cater to the specific health needs of animals, particularly those with certain medical conditions or dietary restrictions. These diets are created by veterinary nutritionists and are tailored to address various health issues such as obesity, kidney disease, diabetes, food allergies, and gastrointestinal problems. The primary goal of therapeutic diets is to support the overall health and well-being of pets by providing them with the necessary nutrients, vitamins, and minerals that are essential for their recovery and long-term health. These diets often include specific ingredients or exclude certain components to manage the symptoms and complications associated with the pet's medical condition, ultimately promoting a better quality of life for the animal.
