Report Overview

Three-wheeled electric cargo bikes are specialized vehicles designed for transporting goods, combining the efficiency of electric-assist cycling with enhanced stability and load capacity due to their three-wheel configuration. These bikes typically feature a sturdy frame, a cargo bed or box (ranging from 100kg to 300kg capacity), and an electric motor (250W-750W) to assist with pedaling, making them ideal for urban logistics, last-mile delivery, and commercial use. Their design prioritizes maneuverability in tight spaces, reducing emissions and operational costs compared to traditional delivery vans. Key variations include front-loading, rear-loading, and flatbed models, catering to different cargo needs, while modular accessories like rain covers and lockable storage enhance functionality.
