Report Overview

A tilting wet grinder is a type of kitchen appliance used for grinding and mixing ingredients, typically used in South Indian cuisine for making batters. ?Wet? refers to the use of water or liquids during the grinding process, which helps in achieving a smooth and consistent texture in the batter. The main feature that distinguishes a tilting wet grinder from a regular wet grinder is its design, which allows the user to tilt the drum to easily remove the ground paste or batter. This feature is particularly useful when the grinder is used frequently or for large quantities, as it makes the process of emptying the grinder more convenient and less messy.
