Report Overview

A tongue cleanser or tongue scraper is a tool used to remove bacteria, food debris, and dead cells from the surface of the tongue. It is typically made from metal or plastic and has a flat, slightly curved blade with a handle. The process of using a tongue cleaner involves gently scraping the surface of the tongue from back to front, effectively removing buildup that can cause bad breath and tooth decay. Tongue cleansers are an important part of oral hygiene, as bacteria on the tongue can contribute to a variety of dental problems. They can also improve the taste of food and leave the mouth feeling clean and fresh. Many dentists and dental hygienists recommend using a tongue scraper as part of a daily oral hygiene routine along with brushing and flossing.
