Report Overview

A Tourniquet System is a medical device used to control blood flow in a limb during surgical procedures, trauma situations, or for blood donation. It consists of a tourniquet cuff, a pump, and a pressure gauge. The cuff is wrapped around the limb, and the pump is used to apply pressure to the cuff, restricting blood flow to the area below the tourniquet. The pressure gauge allows healthcare professionals to monitor the pressure applied and ensures that the tourniquet is applied safely and effectively.
