Report Overview

Transparent plaster, also known as clear adhesive bandages, is a medical product designed to protect minor cuts, scrapes, and wounds while remaining nearly invisible on the skin. Made from thin, flexible materials such as polyurethane or silicone, it provides a breathable and waterproof barrier that adheres securely without obstructing visibility of the wound for monitoring healing progress. Unlike traditional opaque bandages, transparent plaster is favored for its discreet appearance, making it ideal for use on visible areas like the face or hands. Its hypoallergenic properties and ability to conform to skin contours enhance comfort and usability, catering to both medical and cosmetic applications.
