Report Overview

A two-wheeler rope type cable lock is a security device designed to protect motorcycles, scooters, and other two-wheeled vehicles from theft or unauthorized use. This lock is characterized by its flexible, cable-like structure, which is typically made from durable materials such as steel or other strong metals, coated with a protective layer to resist weather and wear. The rope design allows for greater flexibility in securing the vehicle to various fixed objects, such as bike racks or lampposts, without the rigidity of traditional U-locks. The lock mechanism usually involves a combination or key-operated system that secures the cable ends together, preventing unauthorized removal.
