## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on TWS Earbud Chipset competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global TWS Earbud chip production reached 2.28 billion units, with an average selling price of US\$3.25 per unit. The TWS Earbud chip set is the core hardware component that supports true wireless stereo earphones. It can be divided into six functional categories: main Bluetooth control chip, power management chip, sensor chip, audio processing chip (including active noise cancellation chip), transmission chip, and touch/voice recognition chip. The TWS Earbud chip set belongs to the upstream of the TWS earbud industry. Upstream components include main control chips, power management chips, memory chips, batteries, printed circuit boards/flexible circuit boards (PCBs/FPCs), and acoustic components. The components with the highest cost value are the main control chip, battery, and PCB/FPC, each accounting for approximately 15%. Downstream companies in the TWS Earbud chip set market include global mobile phone brands such as Apple, Samsung, Huawei, OPPO, and Xiaomi, as well as professional audio manufacturers such as Harman, Sony, Skullcandy, Edifier, and 1More. From a technical perspective, smart audio control chips face high technical barriers. They must integrate multiple functions, including audio codecs, Wi-Fi/Bluetooth connectivity, far-field and near-field acoustic algorithms, and low-power technologies. Future development trends for control chips will primarily focus on continuously improving active noise reduction and voice wake-up capabilities. Furthermore, they also place high demands on process precision.

The global TWS Earbud Chipset market size was estimated at USD 7410.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.60%

during the forecast period.
