### Report Overview

The U-shaped garage seal is a weatherproofing product designed to fit along the edges of garage doors, providing insulation against drafts, dust, pests, and moisture. Typically made from durable materials like rubber or vinyl, it features a U-shaped cross-section that allows it to clamp securely onto the door frame, ensuring a tight seal when the door is closed. These seals enhance energy efficiency by preventing heat loss in winter and keeping cool air inside during summer, while also reducing noise infiltration. Their primary applications include residential garages, commercial storage units, and industrial facilities where environmental protection and energy savings are priorities.
