Global Vacuum Insulation Panels for Buildings Market Research Report 2026(Status and Outlook)

https://marketpublishers.com/r/V79A8FAD8613EN.html
Date: March 2026
Pages: 164
Price: US$ 3,200.00 (Single User License)
ID: V79A8FAD8613EN

Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Vacuum Insulation Panels for Buildings competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.In 2024, global Vacuum Insulation Panels for Buildings reached approximately 77.4k tons, with an average global market price of around US$ 9000 per ton.Vacuum Insulation Panels (VIPs) for buildings are ultra-high-performance thermal insulation materials designed for energy-efficient construction. VIPs consist of a micro-porous core material?such as aerogel, fiberglass, fumed silica, or mineral fiber?sealed within a gas-tight envelope and evacuated to create a vacuum, drastically reducing thermal conductivity to 0.003?0.008 W/(m?K), roughly one-tenth that of conventional materials (EPS, XPS, PU). They are widely used in passive houses, nearly zero-energy buildings (nZEB), prefabricated construction, wall retrofitting, and cold-chain structures. VIPs offer high insulation efficiency, thin profile, space savings, and long-term stability, making them a critical technology for next-generation building energy-saving solutions.The upstream of vacuum insulation panels for buildings includes microporous core materials (aerogel, fumed silica, glass fiber, calcium silicate), high-barrier films (aluminum foil composite film, metallized PET/PE), desiccants, encapsulation materials, aluminum corner protectors, and testing equipment. Major suppliers include Cabot, Evonik, Wacker, LG Chem, 3M, PPG, DuPont, Shandong Fiberglass, Asahi Glass, and Dongyue Chemical. The midstream consists of VIP manufacturers, including Panasonic, Va-Q-Tec, Knauf, and LG Hausys, responsible for vacuuming, encapsulation, cutting, and stability testing. Downstream applications include passive buildings, ultra-low energy consumption housing, energy-saving renovations of public buildings, prefabricated walls, cold storage walls, rail transit stations, shopping mall curtain walls, and hospital clean rooms. End users include Vanke, Evergrande, Country Garden,

China State Construction Engineering Corporation, China Resources, China Railway Construction Corporation, and Glodon prefabricated building platform companies.The annual production capacity of a single-line Vacuum Insulation Panels for Buildings is approximately 860 tons, with a gross profit margin of approximately 25%-35%.Vacuum insulation panels for buildings, originating from space technology, are environmentally friendly, highly efficient, and energy-saving, representing the world's most advanced high-efficiency insulation material. They are panel-shaped building insulation materials manufactured through processes such as molding, encapsulation, and vacuuming, using core materials and getters as fillers and composite gas-barrier membranes as encapsulating materials. These products effectively prevent air convection, radiation, and heat conduction, significantly reducing the thermal conductivity to below 0.002 W/m?K; they contain no ODS (ozone-depleting substances).

The global Vacuum Insulation Panels for Buildings market size was estimated at USD 697.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.70% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Vacuum Insulation Panels for Buildings market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Vacuum Insulation Panels for Buildings market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Vacuum Insulation Panels for Buildings market.

Global Vacuum Insulation Panels for Buildings Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.

Key Company

Panasonic
Va-Q-tec
LX Hausys
Kingspan
Exceed Technologies
Porextherm
Sealed Air
Turna
Knauf Insulation
OCI Company
Turvac Vacuum Insulation
Tapered Plus
Super Tech Advanced Material
Micolon
Zaisheng Technology
Sanyou Dior
Peak-Tech New Material

Market Segmentation (by Type)

Glass Fiber

+357 96 030922
info@marketpublishers.com

Precipitated Silica
Fumed Silica
Others

Market Segmentation (by Application)

External Wall Insulation
Floor Insulation
Roof Insulation
Pipe Insulation
Others

Geographic Segmentation

North America (USA, Canada, Mexico)

Europe (Germany, UK, France, Russia, Italy, Rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia, Rest of Asia-Pacific)

South America (Brazil, Argentina, Columbia, Rest of South America)

The Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria, South Africa, Rest of MEA)

Key Benefits of This Market Research:

Industry drivers, restraints, and opportunities covered in the study
Neutral perspective on the market performance
Recent industry trends and developments
Competitive landscape & strategies of key players
Potential & niche segments and regions exhibiting promising growth covered
Historical, current, and projected market size, in terms of value
In-depth analysis of the Vacuum Insulation Panels for Buildings Market
Overview of the regional outlook of the Vacuum Insulation Panels for Buildings Market:

Customization of the Report

Chapter Outline

Chapter 1 mainly introduces the statistical scope of the report, market division standards, and market research methods.

Chapter 2 is an executive summary of different market segments (by region, product type, application, etc), including the market size of each market segment, future development potential, and so on. It offers a high-level view of the current state of the Vacuum Insulation Panels for Buildings Market and its likely evolution in the short to mid-term, and long term.

Chapter 3 makes a detailed analysis of the market's competitive landscape of the market and provides the market share, capacity, output, price, latest development plan, merger, and acquisition information of the main manufacturers in the market.

Chapter 4 is the analysis of the whole market industrial chain, including the upstream and downstream of the industry, as well as Porter's five forces analysis.

Chapter 5 introduces the latest developments of the market, the driving factors and restrictive factors of the market, the challenges and risks faced by manufacturers in the industry, and the analysis of relevant policies in the industry.

Chapter 6 provides the analysis of various market segments according to product types, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different market segments.

Chapter 7 provides the analysis of various market segments according to application, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different downstream markets.

Chapter 8 provides a quantitative analysis of the market size and development potential of each region and its main countries and introduces the market development, future development prospects, market space, and capacity of each country in the world.

Chapter 9 shares the main producing countries of Vacuum Insulation Panels for

+357 96 030922
info@marketpublishers.com

Buildings, their output value, profit level, regional supply, production capacity layout, etc. from the supply side.

Chapter 10 introduces the basic situation of the main companies in the market in detail, including product sales revenue, sales volume, price, gross profit margin, market share, product introduction, recent development, etc.

Chapter 11 provides a quantitative analysis of the market size and development potential of each region in the next five years.

Chapter 12 provides a quantitative analysis of the market size and development potential of each market segment in the next five years.

Chapter 13 is the main points and conclusions of the report.

Key Reasons to Buy this Report:

Access to date statistics compiled by our researchers. These provide you with historical and forecast data, which is analyzed to tell you why your market is set to change

This enables you to anticipate market changes to remain ahead of your competitors

You will be able to copy data from the Excel spreadsheet straight into your marketing plans, business presentations, or other strategic documents

The concise analysis, clear graph, and table format will enable you to pinpoint the information you require quickly

Provision of market value data for each segment and sub-segment

Indicates the region and segment that is expected to witness the fastest growth as well as to dominate the market

Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region

+357 96 030922
info@marketpublishers.com

Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled

Extensive company profiles comprising of company overview, company insights, product benchmarking, and SWOT analysis for the major market players

The current as well as the future market outlook of the industry concerning recent developments which involve growth opportunities and drivers as well as challenges and restraints of both emerging as well as developed regions

Includes in-depth analysis of the market from various perspectives through Porter?s five forces analysis

Provides insight into the market through Value Chain

Market dynamics scenario, along with growth opportunities of the market in the years to come

6-month post-sales analyst support

Customization of the Report

In case of any queries or customization requirements, please connect with our sales team, who will ensure that your requirements are met.
