Report Overview

A Vehicle-Mounted Infrared Night Vision System is a sophisticated technological device designed to enhance visibility and safety during nighttime or low-light driving conditions. This system typically incorporates infrared (IR) technology, which detects the heat signatures emitted by objects, allowing the driver to see clearly even in complete darkness. The system may include an array of IR illuminators to project light onto the road ahead, enhancing the visibility of the scene for the camera. The captured images are then processed and displayed on a screen within the vehicle, providing the driver with a clear view of the surroundings.
