Abstracts

BNC (Bayonet-Neill-Concelman) connector is an electrical connector commonly used for video and audio signal transmission. It is named after its two inventors, Paul Neill and Carl Concelman, who developed the connector in the late 1940s. A BNC connector is a type of RF (radio frequency) connector designed for use with coaxial cables. It consists of a cylindrical plug and a socket connected by a bayonet locking mechanism. The center conductor of the coaxial cable connects to the plug, while the outer conductor connects to the receptacle. BNC connectors are commonly used in applications that require high-frequency transmission, such as video surveillance systems, computer networks, and telecommunications equipment. They are also used in laboratory and test equipment such as oscilloscopes and spectrum analyzers.
