Report Overview

Vinyl hexanoate is an organic ester compound primarily used as a flavoring agent and fragrance ingredient in the food, beverage, and cosmetics industries. It is valued for its fruity, sweet aroma, often described as reminiscent of pineapple or green apple, making it a popular choice for enhancing product formulations. The market for vinyl hexanoate is driven by increasing consumer demand for natural and synthetic flavors in processed foods, confectionery, and personal care products. Growth in the global flavor and fragrance industry, coupled with rising disposable incomes and evolving consumer preferences, has further fueled demand.
