Report Overview

Vinyl Liner Swimming Pools are a type of in-ground swimming pool that features a vinyl membrane as the interior lining material. This membrane is designed to provide a smooth, non-porous surface that is both durable and easy to maintain. These pools are known for their ability to retain heat, which can extend the swimming season in cooler climates. The vinyl liner is typically custom-made to fit the specific dimensions of the pool, ensuring a snug fit and a watertight seal. Installation of vinyl liner pools involves excavating the ground, constructing a reinforced concrete shell, and then sealing it with the vinyl liner.
