Abstracts

A virtual restaurant is a food service business that serves customers exclusively by delivery based on phone orders or online food ordering. It is a separate food vendor entity that operates out of an existing restaurant's kitchen. By not having a full-service restaurant premise with a storefront and dining room, virtual restaurants can economize by occupying cheaper real estate. This is in contrast to a ghost kitchen which is a co-working concept for meal preparation with no retail presence that a restaurant/brand or multiple restaurants can buy into.

The global Virtual Restaurant Ghost Kitchens market size was estimated at USD 12800.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.
