Report Overview

Wax Fragrance Melt, also known as wax melts or scented wax cubes, is a type of home fragrance product designed to release pleasant aromas when heated. These melts are typically made from paraffin wax or soy wax and are infused with essential oils or synthetic fragrances to create a variety of scents. They are used in wax melters or warmers, which are electric or candle-powered devices that gently heat the wax, causing it to slowly melt and release the fragrance into the surrounding environment. Wax Fragrance Melts are popular for their ability to provide a consistent and long-lasting scent without the need for an open flame, making them a safer alternative to traditional candles.
