### Report Overview

A wet grinding mill is a device that uses liquid to grind objects. Particles can be milled in different ways, depending on their size and condition. Wet milling is suitable for milling finer particles. Relatively small particles are close to ideal strength and cannot be crushed by simple collision alone. Therefore, by adding a liquid such as water and beads together with the particles, the surface is scraped and the particles are crushed into smaller particles. This process is particularly useful in the medical field for pulverizing pharmaceuticals. Wet grinding mills are used in the medical field to grind pharmaceuticals, and are particularly useful in the medical field.
